V. **New Business**

A. Planning Study Close Out Presentation: Traffic Signal Optimization and Demand Management Study

DTS staff and consultants will provide a presentation to close out the Traffic Signal Optimization and Demand Management Study funded through the Unified Planning Work Program. For this study, consultants prepared an island-wide microsimulation model that is integrated with the OahuMPO travel demand forecasting model. This model will enable OahuMPO and partner agencies to conduct current-year and near-future analyses at the corridor level to evaluate operational and design scenarios.

The model will complement OahuMPO's regional travel demand forecasting model by providing more detailed operational analysis to support the Congestion Management Process (CMP), Oahu Regional Transportation Plan (ORTP), Transportation Improvement Program (TIP), and other planning studies.

B. Oahu Transit Riders: Grassroots Public Transit Advocacy

Oʻahu Transit Riders (OTR) will be giving an introductory presentation of their organization, which works to organize and empower daily commuters, future riders, and transit supporters to shape a transportation system that is reliable, affordable, accessible, safe, and dignified. OTR also hopes to amplify community voices and advocate for safe multimodal streets, affordable neighborhoods, and reliable service on TheBus, Skyline, and Biki.
