VI. New Business

A. Planning Study Close Out Presentation: Traffic Signal Optimization and Demand Management Study

DTS staff and consultants will provide a presentation to close out the Traffic Signal Optimization and Demand Management Study funded through the Unified Planning Work Program FY2024-2025. For this study, consultants prepared an island-wide microsimulation model that is integrated with the OahuMPO travel demand forecasting model. This model will enable OahuMPO and partner agencies to conduct current-year and near-future analyses at the corridor level to evaluate operational and design scenarios.

The model will complement OahuMPO's regional travel demand forecasting model by providing more detailed operational analysis to support the Congestion Management Process (CMP), Oahu Regional Transportation Plan (ORTP), Transportation Improvement Program (TIP), and other planning studies.

Click here to review the final report and here for the StoryMap site.

Requested Action: Recommend the Policy Board approve the Traffic Signal Optimization and Demand Management Study as evidence that the work was carried out, submit documentation of the work completed to the USDOT for approval, and incorporate study findings into the metropolitan transportation planning process.
